Preface ix

List of participants ..... xi–xii

Taxonomy and geographic distribution

Tenagodrilus musculus, a new genus and species of Lumbriculidae (Clitellata) from a temporary pond in Alabama, USA
by M.C. Eckroth & R.O. Brinkhurst 1–9

Kathrynella, a new oligochaete genus from Guyana
by P. Omodeo 11–15

Oligochaetes (Naididae, Tubificidae, Opistocystidae, Enchytraeidae, Sparganophilidae and Alluroididae) of Guyana
by D.F. Stacey & K.A. Coates 17–29

Species separation and identification in the Enchytraeidae (Oligochaeta, Annelida): combining morphology with general protein data
by R.M. Schmelz 31–36

Distribution, abundance and habitat types

Aquatic Oligochaeta in Italy, with special reference to Naididae
by A. di Chiara Paoletti & B. Sambugar 37–49

The distribution of Oligochaeta on an exposed rocky shore in southeast Ireland
by B. Healy 51–62

Oligochaeta and Aphanoneura in ancient lakes: a review
by P. Martin 63–72

Distribution patterns of aquatic oligochaetes inhabiting watercourses in the Northwestern Iberian Peninsula
by E. Martínez-Ansemil & R. Collado 73–83

The effect of water movement on the distribution of Oligochaeta in lakes
by T.D. Slepukhina 85–88

Oligochaeta of Lake Taimyr: a preliminary survey
by T. Timm 89–95

Influence of grain size on the distribution of tubificid oligochaete species
by G. Sauter & H. Güde 97–101

Oligochaetes in the southern basin of the Venetian Lagoon: community composition, species abundance and biomass
by S. Casellato 103–114

Population dynamics

Seasonal dynamics of aufwuchs Naididae (Oligochaeta) on *Phragmites australis* in a eutrophic lake
by B. Löhlein 115–132

Age, stage and size structure as population state variables for *Tubifex tubifex* (Oligochaeta, Tubificidae)
by A. Pasteris, G. Bonomi & C. Bonacina 125–132

Energy budget of *Oligochaeta* and its relationship with the primary production of Lake Sevan, Armenia
by K. Jenderedjian 133–140

Production and population dynamics of *Tubifex tubifex* in the profundal zone of a freshwater reservoir in N. Italy
by C. Bonacina, A. Pasteris, G. Di Cola & G. Bonomi 141–146

Pollution studies

Superficial and hyporheic oligochaete communities as indicators of pollution and water exchange in the River Moselle, France
by M. Lafont, J.C. Camus & A. Rosso 147–155

Reversal of eutrophication in four Swiss lakes: evidence from oligochaete communities
by C. Lang & O. Reymond 157–162

A comparison of two tubificid oligochaete species as candidates for sublethal bioassay tests relevant to subtropical and tropical regions
by M.R. Marchese & R.O. Brinkhurst 163–168

Oligochaetes and eutrophication; an experiment over four years in outdoor mesocosms
by P.F.M. Verdonschot 169–183

Oligochaete communities at the mouth of the Neva and their relationship to anthropogenic impact
by N.P. Finogenova 185–191

Upstream-downstream movement of macrofauna (with special reference to oligochaetes) in the River Raba below a reservoir
by E. Dumnicka 193–198

A comparison of reproduction, growth and acute toxicity in two populations of *Tubifex tubifex* (Müller, 1774) from the North American Great Lakes and Northern Spain
by T.B. Reynoldson, P. Rodriguez & M.M. Madrid 199–206

Histology and ultrastructure

Morphogenesis of helical fibers in haplotaxids
by M. de Eguileor, R. Valvassori, G. Lanzavecchia & A. Grimaldi 207–217

Histochemical characterization of secretions in the reproductive systems of two species of branchiobdellidans (Annelida: Clitellata): a new character for the phylogenetic matrix?
by S.R. Gelder 219–227

An ultrastructural investigation of *Hrabeiella* Pižl & Chalupský, 1984 (Annelida). I. Chaetae and body wall organization
by E. Rota & P. Lupetti 229–239

Peripheral vascular apparatus in some aquatic oligochaetes with special references to haplotaxids
by R. Valvassori, G. Lanzavecchia, M. de Eguileor, A. Grimaldi & L. Colombo 241–249

Development and physiology

Osmoregulation in two aquatic oligochaetes from habitats with different salinity and comparison to other annelids
by O. Generlich & O. Giere 251–261

Cinematographic documentation of enchytraeid morphology and reproductive biology
by W. Westheide & M.C. Müller 263–267

The first two cleavages in *Tubifex* involve distinct mechanisms to generate asymmetry in mitotic apparatus
by T. Shimizu 269–276

Systematics and evolution

Leeches (Oligochaeta?: Euhirudinea), their phylogeny and the evolution of life-history strategies
by M.E. Siddall & E.M. Burreson 277–285

Index 287–295
